// profile

Full stack developer for 17 years: I started out self-taught and today I take websites, apps and SaaS platforms from idea to server, looking after architecture, interfaces and infrastructure. I have been the CTO of an agency and the lead teacher of a Full Stack course, where I trained dozens of students. I work mostly with TypeScript, Vue and Nuxt, Laravel and Directus. I stay curious: I experiment with new technologies, AI included, and always look for the simplest, most solid way to solve a problem.

// latest 9 experiences

Deepser s.r.l. 2026 – now
Senior Back-end Developer
Development and maintenance of the company platform and its new features.

Up2You 2024 – 2025
Full Stack Developer
Platforms for sustainability and marketing, with TypeScript, Laravel, Vue.js and MySQL: custom APIs and optimisation of performance and user experience.

The Full Project 2023 – 2026
CTO & Full Stack Developer
CTO of the agency: architecture, processes and team coordination. I ran the IT department, from servers to CI/CD pipelines, and built the Nuxt and Directus templates for new projects.

Web Artisan Bros 2023 – 2025
Co-Founder & Full Stack Developer
I co-founded a software house building custom digital products: choosing the stack, frontend and backend development, the whole project lifecycle and direct contact with clients.

Boolean Careers 2021 – 2024
Main Teacher of the Full-Stack Web Development course
Lead teacher of the Full Stack course: lessons from HTML to Laravel, React and Node.js, one-to-one mentoring and assessment of the projects of dozens of students.

Develon s.r.l. 2020 – 2021
Senior Full Stack Developer
Enterprise projects, monolithic and microservice-based, with Vue.js and Node.js (Express, AdonisJS, Nest.js): UI components, backend flows and integrations with external systems.

Zucchetti Software Giuridico s.r.l. 2018 – 2020
Front-End Developer
Maintenance and new features of the company's web apps: Vue.js components, refactoring of legacy code and reusable internal libraries.

Freelancer 2017 – now
Full Stack Developer, Web Designer, Mobile Developer
Websites and applications for direct clients: responsive interfaces, hybrid apps with Cordova and then Ionic, WordPress and Joomla sites with custom themes and modules.

Non-profit organisation 2010 – 2017
Desktop & Web Developer
Desktop management applications in Visual Basic, Adobe Flex (AIR) and as Chrome apps and extensions, plus PHP and MySQL websites integrated with Google APIs: Drive, Maps and Sign-In.
